

Bergo Multifix

– an effective cleaning agent for Bergo floors

Bergo Multifix is a cleaning agent specially developed for cleaning of Bergo floors and works efficiently on surfaces in sports halls, outdoor sport courts, workshops, public environments, garages etc. Bergo Multifix effectively dissolves greasy coatings containing oil, soot, grease and also handball adhesives.

Bergo Multifix Cleaning agent, 5 liter

Art. No. 166783

Low foam.

pH-value: Approx 13,4 in concentrate, ca 11,7 in solution (2%)

Storage: Stored cool or at room temperature. Protect from frost.
Storage stability in unbroken packaging is at least 2 years.

ADR: Class 8

Dosage/Instruction for use

Heavily soiled floors:

1. Dosage: Mix 10 % (1 dl per liter) Bergo Multifix with water (preferably hot).
2. Apply the solution with, for example, a pressure sprayer/spray bottle and leave for 5 minutes before cleaning.
3. Clean the floor: Our cleaning tests on the Bergo floors, have shown that the best results are given with rotating brush (e.g. scrubber-drier with vacuuming or similar) with red rondell or high pressure cleaning. (Manual cleaning with a mop functions less well).
4. If you do not use a combi-scrubber-drier with vacuuming, immediately absorb the dirt water and rinse/dry with clean water.

Less soiled floors:

1. Dosage: Mix 5 % (1/2 dl per liter) Bergo Multifix with water (preferably hot).
2. Clean the floor: Our cleaning tests on the Bergo floors have shown that the best results are given with rotating brush (scrubber-drier with vacuuming or similar) with red rondell or high pressure cleaning. (Manual cleaning with a mop or cloth functions less well).
3. If you do not use a combi-scrubber-drier with vacuuming, immediately absorb the dirt water and rinse/dry with clean water.
