# BERGO FLOOR TILES

All weather floors for permanent or portable installations indoor and outdoor on concrete, asphalt, wooden decks or any other hard and smooth surface.

## COMMON GROUND MOISTURE

A concrete floor contains an excess of moisture. If organic material is placed directly on a concrete floor, there is a considerable risk that the material will become damaged, and that mould will eventually form. Bergo Floor Tiles are non-organic, and their construction leaves a distance and air gap under the floor which allowing the surface underneath to ventilate.

## BERGO TILES - THE SOLUTION

Bergo tiles provide an effective solution to common flooring problems such as dampness, coldness, and dullness. These tiles are made of high-quality materials that are resistant to moisture, temperature changes, and wear and tear. Thanks to the open structure of the Bergo tiles, the surface underneath can ventilate. They are easy to install and maintain, making them a cost-effective and long-lasting flooring option. With Bergo tiles, you can transform your space into a comfortable, stylish, and functional area that is free from common flooring issues.
